Campus Safety and Facilities Committee
November 20, 2015

Present: Caitlin Dull (Chair), Chief Grissom, Dave Wozniak, Lance Bryson, Stephanie Erdice, Evan Shircliffe, Thomas Held

Absent: Bill Lensie

I. Lance Bryson was present to explain how projects work from a safety and maintenance perspective. He presented the group with the combined unfunded/funded projects list. He reminded the group that we, as the group, have the ability to prioritize what gets done. This is included prioritizing ADA access, if so choose (This was an example).

II. Grove Hall College of Business elevator is a bit slow, as addressed, but it is safe.

III. Time was spent discussing the access road in front of the residence halls which students aren’t supposed to drive through. There are do not enter signs.

IV. Skateboarders are still not allowed on campus. They have still been found on campus. This is a concern. Signage would be helpful. We discussed where it would be helpful to place said signs. We considered seeing Mary Grace Keller to interview Chief Grissom regarding the issue to get it into The Slate.

V. Safety/maintenance walk will need to be planned. Date has not yet been set. Concern has been expressed with the cold. Should be done in the evening. There are a few lighting projects planned. This will be a good opportunity to check where more may be needed.

VI. Class Council is working on something (?) and may want to speak with this committee.

VII. The academic hall for Engineering will be built (tentatively) by 2020 in the space by the old Naugle Hall that has been torn down now.

VIII. Franklin Science Center is recognizably falling apart. There are plans to rebuild part of the building, eventually.

IX. Dave Wozniak is retiring.

The next meeting is planned for January 29, 2016 at 4:00 p.m.
